

Cisco BroadCloud Carrier and Government UC-One Connect Release Announcement

THIS INFORMATION DOES NOT PERTAIN TO UC-ONE SAAS

Cisco BroadCloud Release Timing: - Release date - Friday November 8th, 2019

The UC-One Carrier Connect clients version 3.8.8 for iOS & Android have been certified for use on the Cisco BroadCloud for Carriers and Government platforms. The Cisco BroadCloud-branded versions of the clients will be ready for production release to all markets including Government on Friday, November 8th, 2019.

Cisco BroadCloud Platform Specific Information

Carrier Platform

Similar to the previously deployed commercial market versions, each of the Connect clients (iOS and Android) support all Cisco BroadCloud market regions from a single client using the region pulldown menu from the login screen.

Government Platform

The new "US Public Sector" region menu option in the Connect clients will only work with the Cisco BroadCloud for Government platform. There is NO PIV support for the Connect clients.

What's New:

No new User Level Features added in Connect 3.8.8. This is a maintenance release with bug fixes. Please see the [Release Notes](#) for more information.

UC-One Release Summary:

Cisco BroadCloud End-User Downloads:

Non-Branding Carriers

At time of release, MyPhone Connect Mobile download links will be updated to point to the new versions of the clients.

Cisco BroadCloud Branding Carriers

The release of Cisco BroadCloud reference clients does not affect any carriers who brands their own clients. Carriers wanting to deploy their own branded versions of the Connect Mobile clients should follow their normal branding and deployment process, and then schedule a date to upgrade their customer base.
